IDetect Touch

All In One Forensic Scanner

Passport Scanner

Company/Product Highlights

Our ID Scanning technology is the fastest in the industry with ¼ second scans, and 5-10 second OCR recognition.

We have been in business since 1989, and have the largest client base of any ID scanning product on the market.

We are located in the USA.

We have the ability to scan over 5000 types of IDs including all USA, Canada, passports, Military Cards, Mexican Consulate Cards, Visas, and many more.

We have the only fully automated new ID format updating process which eliminates stress.

What our valued customers are saying about the products:

"At the NCB Convention in Las Vegas every year we look at all the ID scanners on the market, and every year IDetect is far above them all in regards to reliability and being flexible in different working environments, and can provide a total solution to suit most needs. The handheld scanner reads IDs quickly along with taking photographs of the individual presenting the ID. Depending on how you want your system set up, the display accurately shows details including signatures & photos and flags up "black-listed" entrants instantly. This is just one feature that is keeping my business safer for all my customers. The Customer service and after-sales service are both excellent. We have been a customer of IDetect for over 8 years and we would thoroughly recommend IDetect, Inc."
John Fortuna, The Saddle Rack, Fremont, CA

"IDetect has already assisted in catching 3 offenders in our club because of its automatic picture function. I would recommend this product to anyone trying to protect their liquor license."
Tony Caldarola, Copacabana, NYC

"With IDetect's custom wristband feature we know that everyone in the club has been ID'ed and paid. We can also spot an underage drinker from a distance because they get a different color wristband from the drinking crowd. We have not received a fine or warning since using IDetect."
Ryan Daves, Buffalo Jump Sports Bar, Gallatin Gateway, MT

"Harrah's International requires us to evaluate multiple products before purchasing. IDetect had the best product with the most features for the money."
Jamie Lequire, Harrah's, Cherokee, NC

"I have been conducting a detailed analysis of ID scanner systems over the last few months to determine which would be best for our clubs, what features each one provided, the real time it takes with each to scan and admit patrons (which is obviously a major concern for clubs at busy times) and the documentation each system provides of the admissibility of each patron it has scanned. I have come to the conclusion that IDetect is head and shoulders above any other system I've found."
Larry Kaplan, ACE Michigan, West Bloomfield, MI

"I catch entrants trying to share an ID with their friend/brother/sister constantly. Not only does IDetect signal that an ID is being shared, it also brings up the picture of the actual owner of the ID in use. Very powerful system"
Colleen, Mad Mex Restaurant Corporation, PA

"We decided on the IDetect ID Scanners after evaluating many others, and we rely on them to secure or liquor sales at each of our registers. They have proven to be a great asset to our company."
Ianna, BJ's Wholesale, Northborough, MA

Products
Easy, accurate, powerful...

IDetect
Touch Series

- Scans all 50 states, Canada, Military, Mexican, and many more
- Optional Automatic Entrant Picture for diligence proof
- Automatic picture of ID used (with Image and All In One scanners)
- Operates standalone or optionally connects with IDetect hand-held, Connex, or other Touch systems to share one database
- Optional automatic text alerts
- Optional custom wristband printing for each entrant
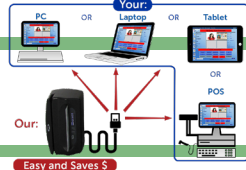

Connex

- Has all of the same functionality as our Touch series systems. but software and ID scanner installs and operates on existing POS equipment or on your supplied PC
- IDetect pops up when an ID is scanned. Requires no added space and saves money!

Quantum
Ruggedized Handheld

- Scans all 50 states, Canada, Military, Mexican, and many more
- Live video feed Built In Camera with optional flash takes a clear picture of each entrant and their ID for diligence proof
- Can be used in the rain, even dropped in a puddle and still will withstand any damage as it integrates Corning® Gorilla Glass® for display damage resistance, housing is designed to withstand multiple 6' drops to concrete, and superior protection against dust.
- Works standalone or via optional Wi-Fi with another IDetect Device or PC
- Network unlimited handhelds for multiple entrances to share one database
- Sends automatic text alerts
- Operates Cash Drawer, Wristband Printing, and Coupon Printing via Wi-Fi

Passport Scanner

- Scans passports, passport cards, and non scannable IDs
- Automatically detects other IDs entrant previously used to maintain ban status
- Fast and accurate
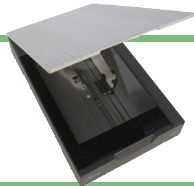

All In One Forensic ID Scanner

- Scans all 50 states, Canada, Military, Mexico, and many more.
- Clearly displays Forensic Infrared and Ultra Violet ID pictures to clearly identify a fake ID.
- Scans and validates MRZ code ID's.
- Scans the front of the ID (OCR) to compare to what is in the barcode to flag fake ID's.
- Compact in size, only 4" High x 4.25" Wide x 6.1" Deep, 2.2 lbs

Key Functionality:

- All IDetect units stop under age, banned, expired, and fake IDs including the ones with a "working" barcode. All In One Scanner displays forensic UV and IR images of the ID for foolproof detection.
- Stops fines, and chargebacks, as well as provides evidence for any legal actions.
- Our passport scanner immediately cross references for other IDs a patron used which maintains ban status.
- Only Handheld on the market that can scan and validate a passport.
- Our Handheld comes with a full line of optional peripherals including a charging docking station, 4 port battery charging stations, and holsters.
- Optional entrant ban flagged from other facilities via the IDetect Cloud network.
- Optional automatic wristband generation for each allowed entrant with their pertinent information including barcode to quickly reference them for banning purposes, or VIP room access.
- Collects and tracks all admission fees with optional cash drawer and receipt printer functionality.
- Automated email address or phone number collection to perform text blasts to previous entrants.
- VIP card creation (Proven to bring previous entrants back to your facility), VIP function, and guest tracking.
- Automated birthday, and/or entry number rewards with automatic coupon printing and full tracking.
- Automated text broadcast to manager, owner, or whomever you decide for certain entry levels reached, banned entrant arrival, entrant placed on ban status, VIP arrival, inspections, or for any other conceivable reason.
- Our systems have proven to build positive relations with law enforcement, liquor control boards, patrons, and other area facilities.
- IDetect has NO MANDATORY MONTHLY FEES. Optional IDetect Shared Ban Cloud fees are negotiable depending on volume.
